

Become a Junior Software Developer

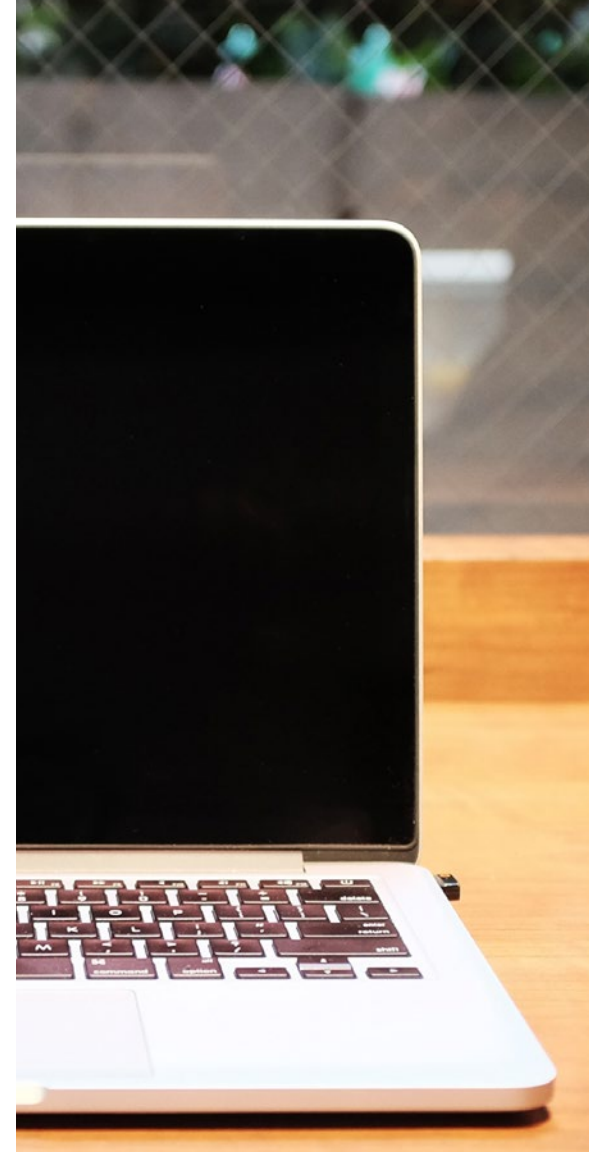

Junior Java Software Developer Training + Placement Program

You've been looking to get a new career in software development. You've seen friends make the jump and start an exciting job in the growing IT field. You've found various expensive training programs that promise to provide the skills you need.

SDET University welcomes you to a holistic training and placement program. We teach you the technical skills and conceptual knowledge needed for today's entry-level software development position.

We go one step further and connect you with hiring managers and recruiters to land interviews. Our success is not defined by the number of graduates, but the number of placements. We guarantee client interviews for the specific positions we prepared you for.
